Discipline and style for a refined range of products.

Design and solution to complement, equip and fit. Materials and finishes that present a new and innovative assembly of interior design.

We address ourselves to those who strive to resolve new concepts in contemporary space usage.

It is possible to define new forms and our design to satisfy a simple desire, to give coherence to new interpretations of interior space, in the search for those details that belong to the development of a project.

We all know that the crucial solution of a design is often accomplished by the use of a new form, especially when it assumes a shape that reveals the soul of a defined space.

This is what interests and move us and which pursue with **metodho**.

Stile e rigore per una ricercata gamma di prodotti.

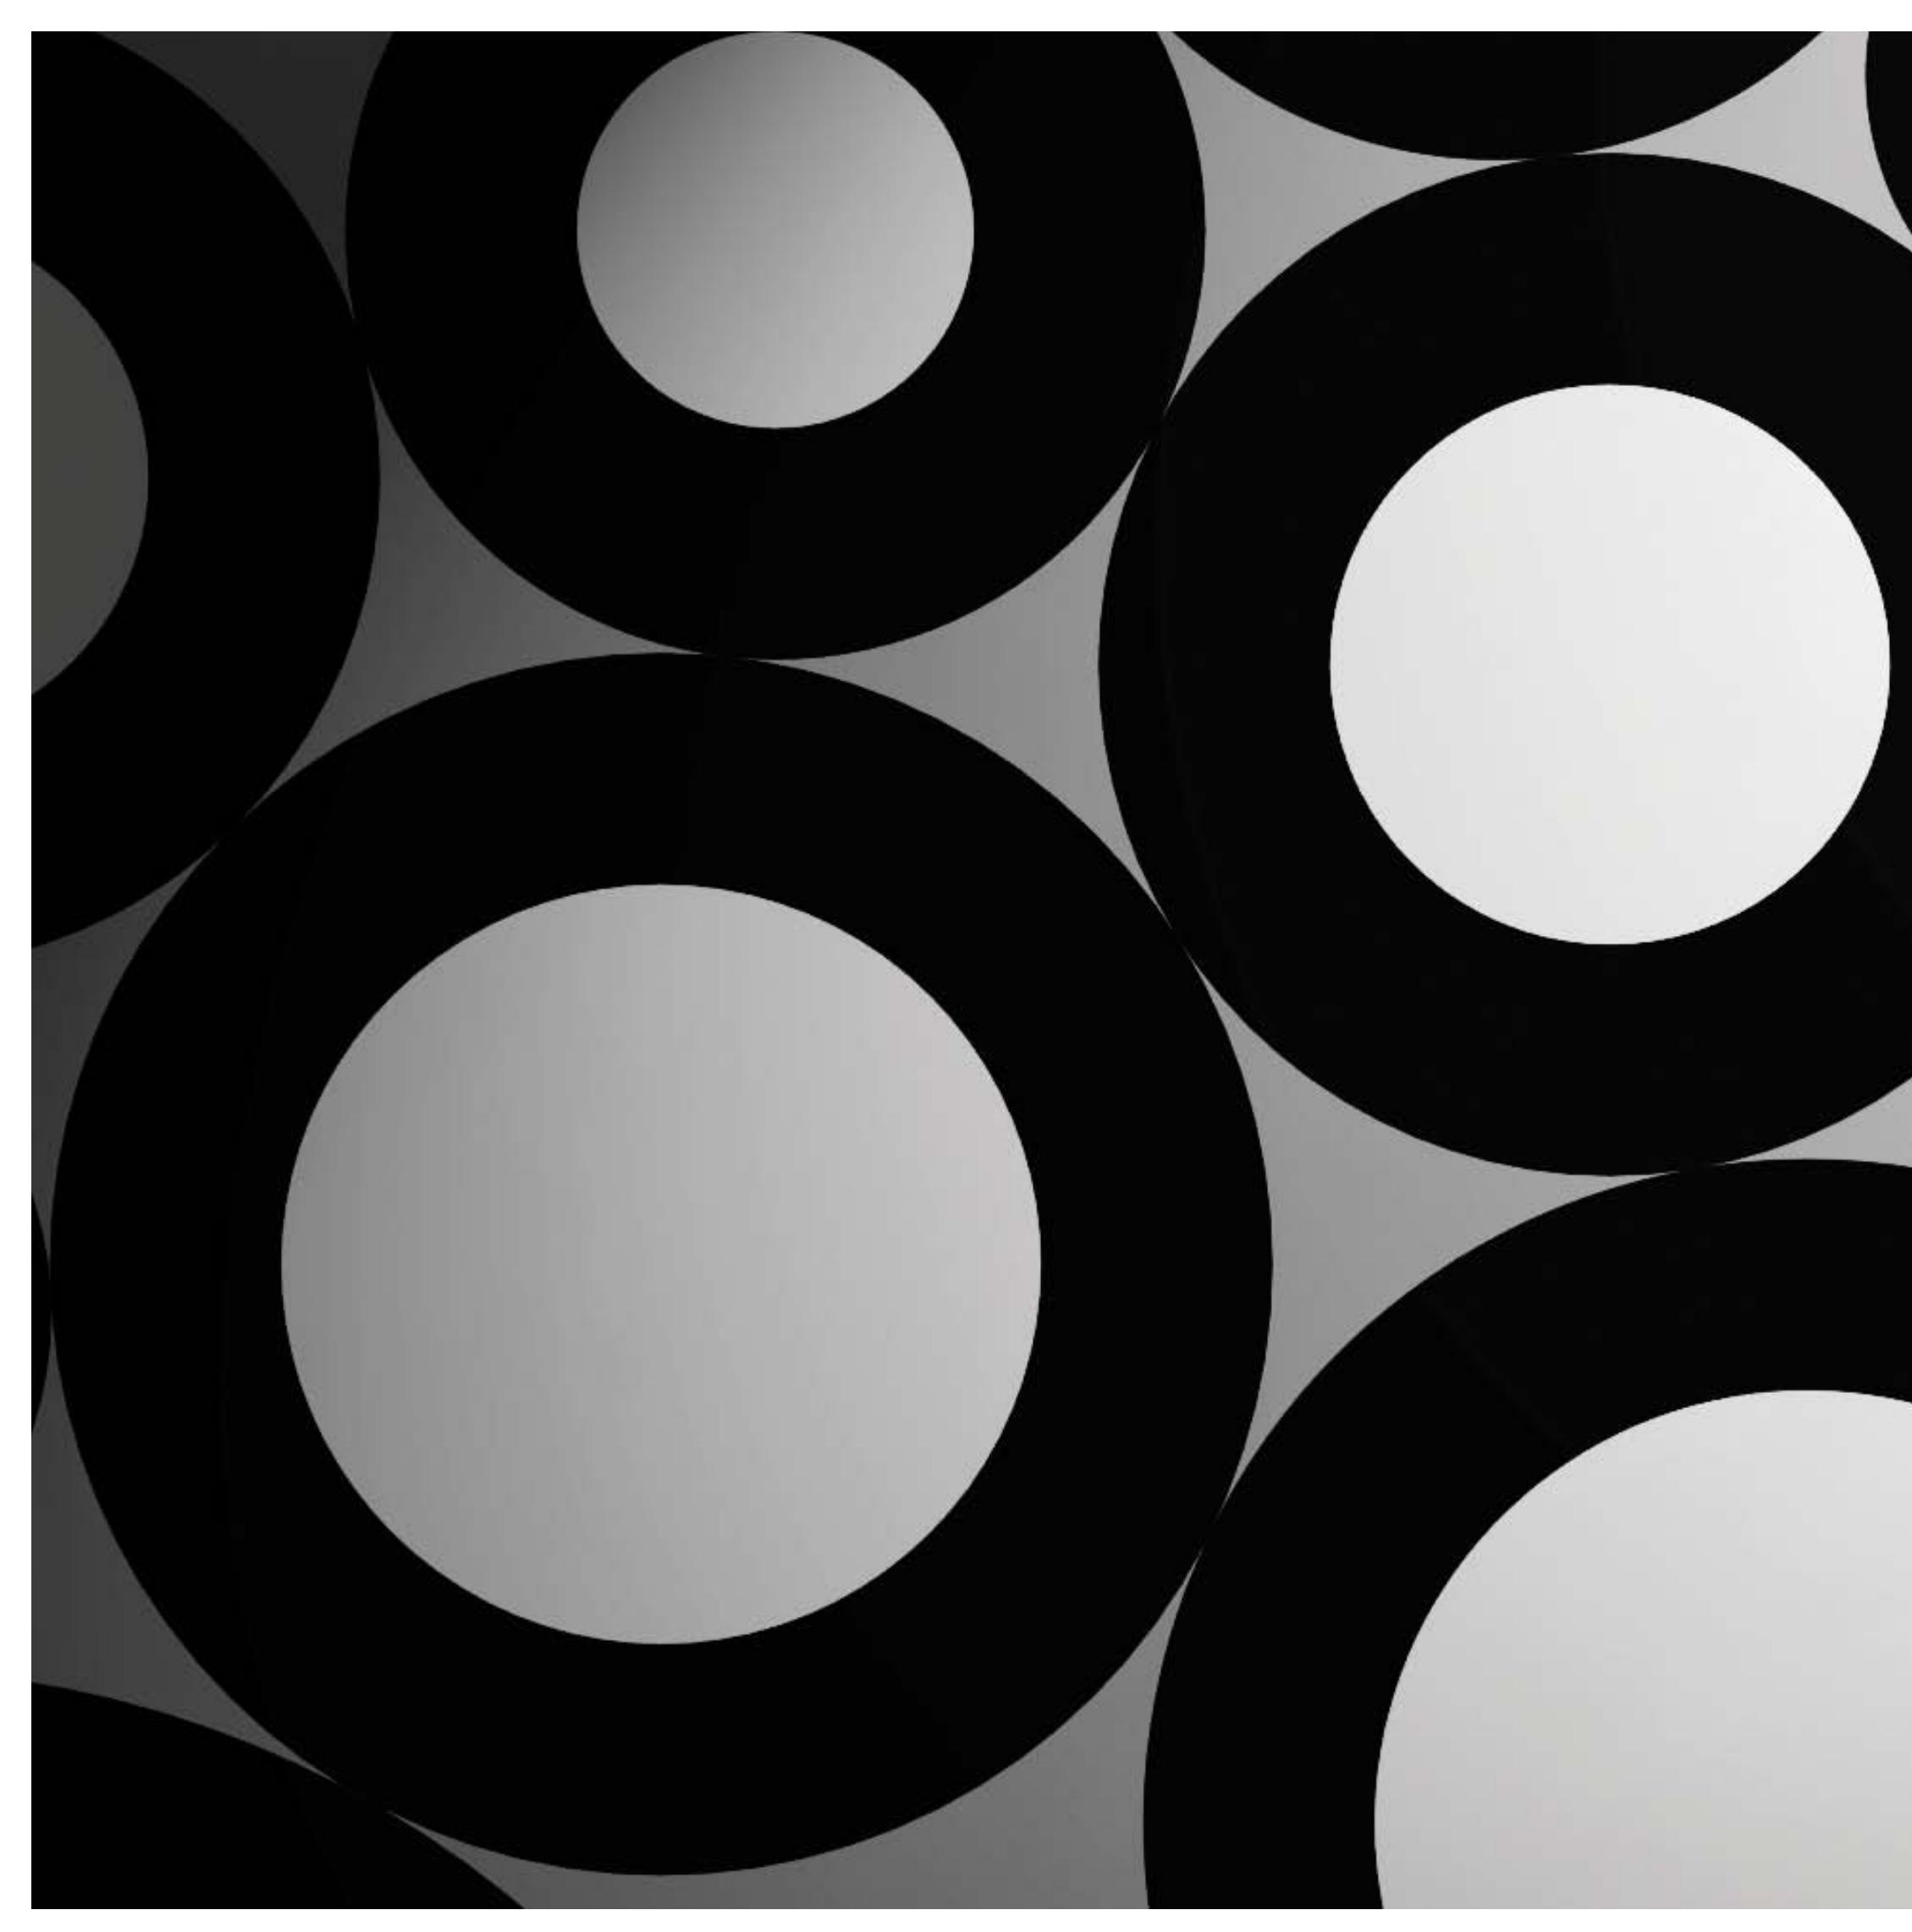

Design e soluzioni per vestire, attrezzare, allestire. Materiali e finiture in grado di articolare un'inedita e innovativa rassegna di architettura di interni.

Ci rivolgiamo a coloro che si impegnano a risolvere le problematiche presenti nella nuova sistemazione degli spazi contemporanei.

E' possibile declinare le forme e le nostre proposte d'arredo per soddisfare un semplice desiderio, per tradurre con coerenza il nuovo assetto di un ambiente, per la ricerca di una connotazione particolare nel disporsi di un progetto rigenerativo.

Sappiamo bene che la risoluzione di un nodo progettuale è spesso determinata dall'adozione di una forma, soprattutto quando questa riesce ad assumere in sé i caratteri rivelatori di uno spazio circoscritto.

E' questo che ci muove e che più ci interessa, e lo perseguiamo con **metodho**.

The left side of the image features a complex, abstract pattern composed of numerous overlapping circles in various sizes and shades of gray, black, and white. This pattern creates a sense of depth and movement.

Soluzioni innovative e design di alto livello incontrano la semplicità e la naturalezza del vetro: gli spazi si vestono di trasparenza per dare vita ad ambienti funzionali e creare soluzioni architettoniche di prestigio. Eleganza e confort, fascino e qualità contraddistinguono le proposte della Metodho, progettate per rispondere alle esigenze più differenti e garantire la massima personalizzazione possibile. Metodho è il partner ideale di architetti, interior designers e contractors nello sviluppo di progetti customizzati.

The most innovative technology and hight level design meet the simplicity and naturalness of glass: the spaces dress in trasparency to give life to functional surroundings and create exclusive architectural solutions. Elegance and confort ,charm and quality distinguish Metodho's proposals, designed to answer to the most different needs and guarantee the maximum personalization possible. Metodho is the ideal partner of architects, interior designers and contractors in the development of personalized solutions.

METHODO

Geometrie rigorose fanno da sfondo a proposte dalla forte personalità.

A project focused on modernity, among formal originality

Una concezione formale ispirata al massimo rigore geometrico per esplorare tutte le possibilità di un materiale unico fra riflessi, luminosità e liberi abbinamenti.

A formal conception inspired by maximum geometrical rigour to explore all the possibilities of a unique material with its reflections, brightness and freedom of combinations with other materials.
